

~~~~~  
**Why the Total AIM Solution is the Last EMS Software Package You'll Ever Need**  
~~~~~

Dear EMS Provider,

Do these three adjectives describe you?

*Under-funded*

*Under-supported*

*Under-appreciated*

Every day, you give of yourself to help those in trouble. You don't do it for the fame. You don't do it for the glory. And, given the fact that federal funding for EMS was slashed again this year, you certainly don't do it for the money.

Today, you're being asked to do more with less than ever before. On top of it all, you have to meet stricter response times.

The February 2008 issue of EMS Magazine reported on the tremendous toll taken on first responders and their families because of their over-stretched budgets and work schedules.

It's time you caught a break.

With the Total Ambulance Information Management (AIM) Solution, you get a software package that will be there for you in all phases of emergency response: BEFORE the call comes in, THROUGH the ambulance ride, UNTIL you get paid.

Your ambulance service is different from every other service, and we appreciate that. With the AIM modules, you can customize the AIM package to meet your specific needs. Take a look at how each module can make your calls easier:

**AIM NEMSIS Gold Electronic Patient Care Reporting (ePCR):**

Every day, more states are requiring EMS providers' software to meet the NEMSIS Gold standard. With AIM ePCR's NEMSIS Gold certification, you can be sure that your patient care reporting will be state and nationally compliant. Best of all, you can organize data collection in the field and data analysis at the station by:

- Computerizing all or part of the process with options of "live" data entry by crews while in the field, or post-trip data entry by billing personnel
- Tracking and resolving incomplete ePCRs using note fields and queues that keep operations staff and crew in constant communication
- Tailoring AIM ePCR to your needs with user-definable fields and customizable screen flow

#### **AIM Billing/Account Receivable:**

One of the biggest headaches for EMS providers is billing. Now you can streamline the whole billing and accounts receivable process with our one-of-a-kind software designed to save time and money. Whether in bill transmission, reporting or payment posting- available as a subscription over the web, or through purchased licenses to use on your local server, AIM Billing allows you to:

- Cut turnaround time in half with electronic insurance claims
- Eliminate the need for third party software from most carriers
- Save major data entry time by batch-posting payments, adjustments, contractual allowances and refunds to numerous accounts with a single transaction
- View reports on individual patient accounts and your entire Accounts Receivable picture

#### **AIM Membership/Subscription:**

With AIM Membership, you can store volumes of data on recurring patients, whether you operate as a subscription-based service or not. Here are a few of the ways AIM Membership can help you find the most profitable areas of your business.

- Keep track of recurring patients' complete call history
- Coordinate subscription/membership drives
- Producing subscriber, statistical and financial reports

#### **AIM Fleet:**

Before you even get the call, you need to make sure your vehicles are ready to roll. With gas now at \$4 per gallon, every penny counts. Here are a few of the ways AIM Fleet keeps you on the road and on budget:

- Track preventative maintenance of vehicles
- Alerts you to warranties due to expire
- Access detailed service history to find recurring problems
- Review and compare fleet repair costs
- Track costs associated with cots, generators and other equipment

**AIM Crew:**

Since response time is the biggest measure of EMS providers, you need to objectively evaluate field personnel performance. With AIM Crew, you can:

- Replace paper files with an electronic system that is more reliable and organized
- Generate complete address/phone lists of all attendants
- View each attendant's call volume for any time period
- Keep track of equipment issued to each crew member
- Be alerted when important certifications, vaccinations, and licenses are due for renewal

The best part of the Total AIM Solution? You can buy and install the software on your PC or server, or access it via the Web with our hosting package that includes version updates, security and backup for one affordable monthly fee.

The bottom line: the Total AIM Solution is THE solution to your EMS software needs.

**Your job is dealing with emergencies. Our job is preventing them.**

**Call now to save thousands of dollars with the Total AIM Solution.**
