

## Are You Ready for New State and Federal Regulations Impacting EMS?

**HIPAA? EHR? ARRA? PHI? SAF? Red Flag Rules? HITECH Act? NEMSIS?**

Our world of acronyms and initialism is not slowing down. Are you keeping up?

This has been a year of political and economic shifts that have impacted us all. With the passing of **ARRA-American Recovery and Reinvestment Act of 2009** (commonly referred to as the **Stimulus**) came the new age of HIPAA. As providers try to determine the impact – such as eligibility for Electronic Health Records (EHR) incentives and HIPAA impacts to current workflow, we become increasingly aware of the importance of advanced software that can manage EMS electronic patient care reporting and billing.

[RAM Software Systems](#) has dedicated over 20 years to technology that supports EMS, acquiring the knowledge and experience needed to help ensure your billing and patient care reporting not only improve quality and efficiencies, but help you meet the requirements of legal and regulatory standards.

### The Ambulance Information Management System (AIM):

#### [AIM NEMSIS Gold ePCR](#)

- ✓ Improve clinical documentation to support appropriate billing level
- ✓ LifePak® interface for easier and more reliable tracking of patient care data
- ✓ Comprehensive error checking

#### [AIM Billing](#)

- ✓ Electronic claim and remittance processes
- ✓ Automatic and batch posting processes
- ✓ Work management navigation for monitoring pending activities

#### [All AIM modules offer](#)

- ✓ Affordable monthly payments with Web access any time, anywhere
- ✓ HIPAA Compliant format
- ✓ Ability to attach supporting documents, eliminating the need for paper copies
- ✓ Web-based and Network (LAN/WAN) versions available

The economics of healthcare are changing dramatically. EMS is increasingly challenged to continuously improve productivity, even as they must spend more time documenting and reporting on the care they deliver. Let us help you effectively meet the often conflicting demands of payors, regulators, and patients. **Call 1-800-726-4690 for details.**
